33" Modular Table Configurations

Our 33" modular tables are compact and can adapt to your smaller mailroom applications as a stand-alone station. This smaller table can be used to construct a corner workstation layout by connecting larger tables on either side to form an L-shape or U-shape mailing station. Risers and sorters can be added to this table to create an efficient mailroom unit.

Please note: When designing a corner configuration the riser and sorters are placed on an angle for ease of accessing all mail slots. When ordering a corner unit please order an (MT-3333) as this table used in a corner configuration does not require a shelf and doors.
